Exterior Fluoropolymer Applications

The new owners of Houston Industries Plaza faced a dilemma. The building's twenty-three year old anodized skin was dull, faded, and didn't match the newly renovated image. The solution was a complete on-site refinishing with PPG's Duranar ADS. This Kynar based paint was spray applied by THE LEE QUIGLEY COMPANY in ten months time. The 150' work platform assured a consistent application and a production rate to finish the project on schedule. Completed February, 1996.

Work in progress, East Elevation, Floors 33 and 34

Houston Industries Plaza

Owner	Houston Industries Incorporated
Developer	Hines Interests Ltd Partnership
Design Architect	Keating Mann Jernigan Rottet
General Contractor	Miner-Dederick Constructors

Exterior Fluoropolymer Application

The original 20 year old painted finish on the Greenspoint 3 Building, Houston –TX was badly faded and peeling. The solution was a complete refinish with PPG / Keeler & Long's Megaflon MS. A double-shift was implemented to expedite completion time. Completed 2002.
