## architectural metal refinishing

### Metal Maintenance Programs

The Lee Quigley Company provides ongoing metal maintenance for customers who demand their building always looks its finest. We custom design these programs to best suit the individual customer's needs and budget constraints. By combining scheduled refinishing with periodic surface cleaning, we keep a building's metals gleaming with the look it deserves.

#### Benefits:

- Budgeting becomes very easy. In most cases an average monthly payment is used. This assures no surprises or ballooning payments
- We provide periodic inspections becoming the "eyes" for the metals in the building. This frees the Property Manager to spend his / her free time on more important matters.
- We provide a schedule of refinishing for each item, making it very easy for the Property Manager to track the program's progress
